JanGyan — Learn Without Limits

Category 3: Road Safety & Public Safety

Module 7 – Emergency Response & Accident Management

🗐 Module Overview

This handbook is your complete, beginner-to-advanced guide to **Emergency Response & Accident Management** — what to do in the critical minutes after a road accident, whether you are involved, a witness, or simply the first person to arrive. Whether you are a driver, a pedestrian, or someone who simply wants to be ready to help, this handbook is written so that you can read it once and know exactly what to do when it matters most.

By the end of this module, you will not need to search anywhere else to understand emergency response and accident management in India.

🎯 Learning Objectives

After completing this module, you will be able to:

- Understand what to do immediately after witnessing or being involved in an accident
- Understand the Golden Hour concept and why it saves lives
- Call emergency services correctly and effectively
- Apply basic first aid to an accident victim
- Help accident victims safely and legally, without fear of harassment
- Report an accident correctly to the police
- Understand the basics of filing a motor insurance claim
- Understand your rights and options in a hit-and-run case
- Know what to keep in a roadside emergency kit
- Know India's key emergency contact numbers by heart

🚦 Why This Topic Matters

A road accident can happen to anyone, at any time — and what happens in the minutes immediately afterward often matters more than anything a hospital can do later. Yet most people freeze, panic, or simply do not know what to do.

> **Reality Check:** India lost **1,72,890 lives to road crashes in 2023** — roughly one death every three minutes. In January 2025, the Supreme Court ruled that timely trauma care during the Golden Hour is not just good practice, it is part of the **fundamental right to life under Article 21** of the Constitution. Yet fear of legal harassment has long stopped many bystanders from helping.

This is why knowing exactly what to do — and knowing that the law protects you for doing it — can be the difference between life and death.

🕮 Introduction

Emergency Response & Accident Management covers the full sequence of actions from the moment an accident happens — securing the scene, calling for help, providing first aid, helping the victim reach care, reporting the accident, and navigating insurance and compensation afterward.

Stage	What It Involves
Scene Safety	Preventing further harm to victims, helpers, and other road users
Emergency Call	Getting professional help moving as fast as possible
First Aid	Stabilising the victim until professional help arrives
Reporting	Creating an official record for legal and insurance purposes
Claims & Compensation	Ensuring victims and families receive the support they are entitled to

🧠 Fundamental Concepts

Before going deeper, let us understand a few foundational ideas that the rest of this module is built upon.

What Is the Golden Hour?

> **Golden Hour** — Legally defined under Section 2(12-A) of the Motor Vehicles Act as the first hour following a traumatic injury, during which prompt medical care offers the highest chance of preventing death.

The DRSABC Framework

First responders — professional or otherwise — follow a simple, memorable sequence: **D**anger (is the scene safe?), **R**esponse (is the victim

conscious?), **S**end for help (call emergency services), **A**irway (is it open?), **B**reathing (is it present?), **C**irculation/CPR (is there a pulse, and is bleeding controlled?). This order matters — skipping ahead can put you or the victim at greater risk.

Key Definitions

- **Good Samaritan** — A bystander who voluntarily helps an accident victim, legally protected from harassment
- **FIR (First Information Report)** — The police's first official written record of a reported incident
- **MACT** — Motor Accident Claims Tribunal, a specialised forum for compensation claims
- **Solatium Fund** — A government fund compensating victims of hit-and-run accidents where the vehicle is untraceable
- **No-Fault Liability** — A right to interim compensation without needing to first prove who was at fault

🖨 Complete Detailed Explanation

Part A — What to Do After an Accident

1. Ensure your own safety first — check for oncoming traffic, fire, fuel leaks, or unstable vehicles before approaching
2. Call emergency services immediately — do not wait for someone else to do it
3. Check victims for consciousness and breathing without moving them unnecessarily
4. Control any major bleeding and keep the victim as still and warm as possible
5. Wait with the victim, guide the ambulance in, and cooperate with arriving police and medical staff

Part B — The Golden Hour Concept

In **S. Rajaseekaran vs. Union of India** (January 2025), the Supreme Court ruled that denying timely trauma care during the Golden Hour violates the right to life under Article 21, and directed the Union Government to roll out a nationwide cashless treatment scheme by mid-March 2025. The **Cashless Treatment Scheme, 2025** — notified under Section 162 of the Motor Vehicles Act via S.O. 2015 (5 May 2025) and its operating guidelines S.O. 2489 (4 June 2025) — now guarantees free treatment of up to **₹1.5 lakh for the first seven days** at designated hospitals for every road accident victim, brought in within 24 hours, regardless of nationality or fault. The scheme is implemented by the National Health Authority through an online Transaction Management System linked to MoRTH's e-DAR accident-reporting platform, and even initial stabilisation at a non-designated hospital is covered.

Part C — Calling Emergency Services

112 is India's unified emergency number, connecting to police, fire, and ambulance services under the Emergency Response Support System (ERSS). It works even without a SIM card, on a locked phone, or with no active network signal, and on many smartphones can be triggered by pressing the power button three times in quick succession. When you call, clearly share:

- The exact location — a landmark, kilometre stone, or shared live GPS location if possible
- The number of people injured
- Their apparent condition — conscious or not, breathing or not, visible bleeding

Part D — Basic First Aid

Basic first aid, drawn from Indian Red Cross Society and St John Ambulance guidance, can meaningfully improve a victim's chances before professional help arrives:

- **CPR:** If unresponsive and not breathing normally, give 30 chest compressions (about 5–6 cm deep, at 100–120 per minute) followed by 2 rescue breaths, and repeat
- **Bleeding:** Apply firm, direct pressure on the wound with a clean cloth; elevate the injured limb if no fracture is suspected; use a tourniquet only as a last resort for severe limb bleeding, noting the exact time it was applied
- **Suspected spinal injury:** Assume it in any high-speed collision or fall — avoid moving the victim, and if the airway needs opening, use a jaw thrust rather than tilting the head
- **Helmets:** Never remove a helmet from a conscious rider — it helps stabilise the neck
- **Unconscious but breathing:** Place in the recovery position with spinal precautions, unless a spinal injury is suspected

Part E — Helping Accident Victims (Good Samaritan Protection)

India's Good Samaritan Guidelines, given binding legal force following **SaveLIFE Foundation vs. Union of India** (2016), protect anyone who helps an accident victim from police harassment, repeated questioning, or being compelled to disclose their name or contact details unless they choose to. This built on the earlier landmark ruling in **Parmanand Katara vs. Union of India** (1989), which held that hospitals cannot refuse emergency treatment to any injured person. To further encourage bystander help, the **"Rahveer" scheme** rewards Good Samaritans who assist victims within the golden hour with ₹25,000, and the ten most exemplary interventions each year receive additional national recognition.

Part F — Reporting an Accident

An accident should be reported to the nearest police station as soon as possible; if the accident occurred elsewhere, a **Zero FIR** can be filed at any police station regardless of jurisdiction, which is then transferred to the appropriate station. The report should include the location, time, vehicles involved, and any witnesses. Increasingly, accidents are also logged through MoRTH's **e-DAR (electronic Detailed Accident Report)** system, which creates a standardised digital record that can later support insurance claims and, in some cases, even be treated by the Motor Accident Claims Tribunal as the basis for a claim petition.

Part G — Insurance Claim Basics

Motor insurance claims generally fall into two types: **own-damage claims**, handled directly with your insurer under your policy, and **third-party claims**, handled through the **Motor Accident Claims Tribunal (MACT)** when another party's vehicle causes injury, death, or damage. Under Section 140, victims can also claim interim **no-fault liability** compensation — ₹50,000 for death or ₹25,000 for permanent disability — without first having to prove who was at fault. Typical documents required include the FIR copy, medical records, identity proof, and bank details.

Part H — Hit and Run Awareness

When the vehicle or driver responsible for an accident cannot be traced despite reasonable effort, victims or their families can claim from the government's **Solatium Fund** under Section 161 of the Motor Vehicles Act — currently **₹2 lakh for death and ₹50,000 for grievous injury** for accidents on or after 1 April 2022. This claim does not depend on identifying the vehicle, and is filed with the **Claims Inquiry Officer (CIO)**, typically the police officer in charge of the station where the FIR was registered, along with the FIR copy, medical records, and identity proof. Any amount already received under the Golden Hour cashless treatment scheme is deducted from the final payout, which is usually processed within about 15 days of sanction. If a victim accepts Solatium compensation, they generally cannot also pursue a separate MACT claim for a higher amount.

Part I — Roadside Emergency Kit

A basic kit, kept in every vehicle, can make a genuine difference in the first minutes of an emergency:

- A first-aid kit (dressings, bandages, antiseptic, gloves)
- A torch or flashlight, and reflective warning triangle or cones
- A small fire extinguisher
- A spare tyre, jack, and basic tools; jumper cables
- Drinking water and a phone charger or power bank
- A written list of emergency numbers and an "In Case of Emergency" (ICE) contact card

Part J — Emergency Contact Numbers

Covered in full in the dedicated section below — the numbers most worth memorising are **112** for any emergency and **1033** for highway-specific breakdowns or accidents.

📝 Important Terminologies

Term	Simple Meaning
Golden Hour	The first hour after a traumatic injury, critical for survival
Good Samaritan	A bystander who helps an accident victim, protected by law
Zero FIR	An FIR filed at any police station, regardless of where the incident occurred
e-DAR	Electronic Detailed Accident Report, a standardised national accident record
MACT	Motor Accident Claims Tribunal, for third-party compensation claims
Solatium Fund	A government fund compensating hit-and-run victims
No-Fault Liability	Interim compensation available without first proving fault
CIO	Claims Inquiry Officer, who processes Solatium Fund claims
DRSABC	Danger, Response, Send for help, Airway, Breathing, Circulation/CPR
ERSS	Emergency Response Support System, behind India's 112 helpline

🧭 Step-by-Step Understanding

Responding to an Accident Scene

1. **Danger:** Check the scene is safe to approach — traffic, fire, fuel, unstable vehicles
2. **Response:** Gently check if the victim is conscious and responsive
3. **Send for help:** Call 112 immediately, sharing location and victim condition
4. **Airway:** If unconscious, check the airway is open — use a jaw thrust if spinal injury is possible
5. **Breathing:** Look, listen, and feel for normal breathing
6. **Circulation/CPR:** Control major bleeding; begin CPR if there is no normal breathing

Filing an FIR After an Accident

1. Go to the nearest police station, or any station if you are away from the accident location (Zero FIR)
2. Provide the location, time, vehicles involved, and witness details as accurately as possible

3. Ensure the accident is also logged in the e-DAR system where available
4. Collect a copy of the FIR — it is required for insurance and compensation claims

Filing a Solatium Fund Claim (Hit-and-Run)

1. Report the accident and obtain an FIR copy
2. Gather medical records, a death certificate if applicable, and identity proof
3. Submit the application to the Claims Inquiry Officer at the relevant police station
4. The CIO forwards the claim to the Claims Settlement Commissioner for verification and disbursement

🇮🇳 Real-Life Indian Examples

- **S. Rajaseekaran vs. Union of India (2025):** The Supreme Court's ruling that Golden Hour trauma care is a constitutional right directly forced the Union Government to finally notify the Cashless Treatment Scheme, decades after the underlying legal provision was first written into the Motor Vehicles Act.
- **Parmanand Katara vs. Union of India (1989):** This landmark case established that no hospital, public or private, can refuse emergency treatment to an injured person on the grounds of formalities like police clearance or payment — a principle that still protects accident victims today.
- **The Rahveer Scheme:** By offering a ₹25,000 reward and national recognition for Good Samaritans, the government has tried to directly counter the widespread reluctance to stop and help, which researchers have long identified as a major barrier to golden-hour survival in India.
- **e-DAR Adoption:** By linking accident reporting directly to the Cashless Treatment Scheme's claims system, MoRTH's e-DAR platform is gradually reducing the paperwork burden on victims and families at an already difficult time.

💬 Practical Scenarios

Scenario 1: You witness an accident on a highway at night with poor visibility.
Turn on hazard lights, place a warning triangle behind your vehicle if safe, and call 112 before approaching, so oncoming traffic is alerted to the scene.

Scenario 2: An accident victim is unconscious and you suspect a spinal injury.
Do not move them. Open the airway using a jaw thrust if needed, and wait for trained emergency responders unless there is an immediate danger like fire.

Scenario 3: A pedestrian is struck by a vehicle that speeds away before you can note its number.
Report the incident to the police immediately and inform them it was a hit-and-run — the victim's family can still claim compensation through the Solatium Fund without identifying the vehicle.

Scenario 4: You want to help an injured stranger but worry about police harassment or getting "involved."
Go ahead and help — Good Samaritan protections mean you cannot be compelled to reveal your identity or face repeated police questioning simply for assisting.

Scenario 5: You bring a victim to a hospital and staff ask for payment before starting treatment.
Inform them the patient may qualify for the Cashless Treatment Scheme 2025, and that hospitals cannot lawfully demand upfront payment or refuse admission to a road accident victim during the golden hour.

🏛 Government Rules / Guidelines

- **Good Samaritan Guidelines, 2015:** MoRTH guidelines protecting bystanders who help accident victims from harassment or unnecessary legal entanglement.
- **Cashless Treatment Scheme, 2025:** Guarantees free emergency treatment up to ₹1.5 lakh for the first seven days after an accident, at designated hospitals.
- **"Rahveer" Scheme:** Rewards and recognises Good Samaritans who help accident victims within the golden hour.
- **e-DAR Project:** MoRTH's centralised digital accident-reporting system, linked to insurance and compensation processes.
- **Emergency Response Support System (ERSS):** The Ministry of Home Affairs initiative behind India's unified 112 emergency number.
- **National Health Authority (NHA):** The implementing agency for the Cashless Treatment Scheme, operating the online Transaction Management System.

⚖ Laws & Policies

KEY LEGAL PROVISIONS

Provision	What It Covers
Section 2(12-A), MV Act	Defines the "Golden Hour" as the first hour after a traumatic injury
Section 134, MV Act	Duty of a driver involved in an accident to give information and render reasonable assistance
Section 140, MV Act	No-fault liability — interim compensation without needing to prove fault
Section 161, MV Act	Solatium Fund compensation for hit-and-run accidents
Section 162, MV Act	Cashless treatment scheme during the golden hour
Article 21, Constitution	Right to life, judicially extended to include timely trauma care

KEY COMPENSATION AMOUNTS

Situation	Amount
No-fault liability (death)	₹50,000 (interim, Section 140)
No-fault liability (permanent disability)	₹25,000 (interim, Section 140)
Hit-and-run Solatium (death)	₹2,00,000 (Section 161, post-April 2022)
Hit-and-run Solatium (grievous injury)	₹50,000 (Section 161, post-April 2022)
Cashless golden hour treatment	Up to ₹1,50,000 for 7 days (Section 162)
Rahveer Good Samaritan reward	₹25,000

Note: Amounts under Section 162 already paid are deducted from Section 161 hit-and-run compensation. Always verify current figures with official sources, as schemes are periodically updated.

📊 Important Statistics (India)

Indicator	Figure
Road deaths in India (2023)	1,72,890 — roughly one every three minutes
Cashless treatment coverage	Up to ₹1.5 lakh for the first 7 days
Window to qualify for cashless treatment	Victim reaches hospital within 24 hours of the accident
Hospital payment timeline (after claim approval)	Within 10 days
Solatium Fund claim processing time	Around 15 days after the sanction order
CPR compression rate	100–120 compressions per minute

✅ Best Practices

- Call 112 immediately — do not wait for someone else to do it first
- Check scene safety before approaching any accident
- Follow DRSABC in order — don't skip steps under pressure
- Keep a stocked roadside emergency kit in every vehicle
- Save key emergency numbers in your phone, not just in memory
- Know that helping a victim carries legal protection — act without hesitation
- Keep copies of FIRs, medical records, and claim documents organised and accessible

✕ Common Mistakes

- Hesitating to help out of fear of legal harassment
- Moving an injured person unnecessarily, risking a spinal injury
- Removing a conscious rider's helmet after a crash
- Waiting to negotiate hospital payment before allowing treatment to begin
- Failing to file an FIR or e-DAR report, complicating later claims
- Assuming a hit-and-run victim has no compensation options
- Not keeping a first-aid kit or emergency numbers readily accessible

🔍 Myths vs Facts

Myth	Fact
"Helping an accident victim gets you dragged into legal trouble"	Good Samaritan guidelines specifically protect helpers from harassment and repeated questioning
"Hospitals can refuse treatment until police arrive"	Since Parmanand Katara vs. Union of India (1989), hospitals cannot lawfully refuse emergency treatment on such grounds
"Hit-and-run victims can't get compensation without finding the vehicle"	The Solatium Fund specifically provides compensation without requiring the vehicle to be identified
"You must remove a rider's helmet to check on them"	A helmet should stay on a conscious rider, as it helps stabilise the neck
"Cashless treatment only applies at government hospitals"	It applies at all designated hospitals, including many empanelled private ones

📌 Do's and Don'ts

Do	Don't
Call 112 immediately after any serious accident	Don't assume someone else has already called
Check scene safety before approaching	Don't rush in without checking for traffic, fire, or fuel leaks
Apply firm direct pressure to control bleeding	Don't remove embedded objects from a wound
Keep a suspected spinal injury victim still	Don't move them unless there is immediate danger
File an FIR or e-DAR report after any accident	Don't skip reporting, even for seemingly minor incidents
Keep emergency numbers saved in your phone	Don't rely on memory alone in a crisis

🛡 Safety Tips

At the Scene

- Use hazard lights and a warning triangle to alert oncoming traffic
- Ask bystanders to help direct traffic or guide the ambulance in

First Aid

- Wash your hands or use gloves if available, before helping, to reduce infection risk
- Keep talking calmly to a conscious victim — it helps reduce shock

After the Accident

- Take photos of the scene, vehicles, and any visible damage for your records
- Note down witness names and contact details before they leave

Preparedness

- Consider a basic first-aid or CPR course through the Indian Red Cross Society or St John Ambulance
- Review and refresh your roadside emergency kit every few months

👜 Practical Checklist

- [ ] I have 112 and other key emergency numbers saved in my phone
- [ ] My vehicle carries a stocked roadside emergency kit
- [ ] I know the basics of DRSABC and CPR
- [ ] I know that helping a victim is legally protected, not risky
- [ ] I know how to file an FIR or Zero FIR after an accident
- [ ] I understand the basics of no-fault liability and Solatium Fund claims
- [ ] I know the Cashless Treatment Scheme covers the golden hour at designated hospitals
- [ ] I keep copies of important documents (ID, insurance) accessible digitally

🎓 Quick Revision Notes

- Golden Hour = first hour after traumatic injury (Section 2(12-A), MV Act)
- Cashless Treatment Scheme 2025: up to ₹1.5 lakh for 7 days, at designated hospitals
- 112 = unified emergency number; works without SIM, network, or unlocked phone
- DRSABC: Danger, Response, Send for help, Airway, Breathing, Circulation/CPR
- Good Samaritans are legally protected from harassment; Rahveer scheme rewards ₹25,000
- Hit-and-run Solatium: ₹2 lakh death / ₹50,000 grievous injury, no vehicle ID needed
- No-fault liability: ₹50,000 death / ₹25,000 disability, interim, fault not required
- Zero FIR can be filed at any police station, regardless of jurisdiction

🎯 Key Takeaways

1. What happens in the first hour after an accident can matter more than anything that follows

2. Calling 112 immediately and correctly is the single most important first step
3. Basic first aid knowledge — DRSABC, CPR, bleeding control — genuinely saves lives
4. The law actively protects those who stop to help, removing a major historical barrier
5. Compensation systems exist even when the responsible vehicle cannot be traced
6. Being prepared — a kit, saved numbers, basic training — turns panic into effective action

🕮 Glossary

- **CIO (Claims Inquiry Officer)** — The official who processes Solatium Fund claims
- **DRSABC** — Danger, Response, Send for help, Airway, Breathing, Circulation/CPR
- **e-DAR** — Electronic Detailed Accident Report, a standardised national accident record
- **ERSS** — Emergency Response Support System, behind India's 112 helpline
- **FIR** — First Information Report, the police's first official record of an incident
- **Golden Hour** — The first hour after a traumatic injury, critical for survival
- **Good Samaritan** — A bystander who helps an accident victim, protected by law
- **MACT** — Motor Accident Claims Tribunal, for third-party compensation claims
- **No-Fault Liability** — Interim compensation available without first proving fault
- **Solatium Fund** — A government fund compensating hit-and-run victims

? Frequently Asked Questions

1. What is the "Golden Hour"?

The first hour after a traumatic injury, legally defined under Section 2(12-A) of the Motor Vehicles Act, when prompt treatment offers the best chance of survival.

2. What number should I call in a road accident emergency?

112, India's unified emergency number, which connects to police, fire, and ambulance services.

3. Does 112 work without a SIM card or network?

Yes, it can work without a SIM card and using any available network, even on a locked phone.

4. What is the Cashless Treatment Scheme, 2025?

A scheme guaranteeing free treatment of up to ₹1.5 lakh for the first seven days after a road accident, at designated hospitals.

5. Can I get into legal trouble for helping an accident victim?

No. Good Samaritan guidelines protect helpers from harassment and cannot compel them to disclose their identity.

6. What is the Rahveer scheme?

A government scheme rewarding Good Samaritans with ₹25,000 for helping accident victims within the golden hour.

7. What is DRSABC?

A first-aid response sequence: Danger, Response, Send for help, Airway, Breathing, Circulation/CPR.

8. What is the correct CPR ratio for an adult?

30 chest compressions followed by 2 rescue breaths, repeated, at a rate of 100–120 compressions per minute.

9. Should I remove an injured rider's helmet?

No, not if they are conscious — the helmet helps stabilise the neck and should be left in place.

10. What is a Zero FIR?

An FIR that can be filed at any police station, regardless of where the accident actually occurred, and is later transferred to the correct station.

11. What is e-DAR?

MoRTH's electronic Detailed Accident Report system, a standardised digital record of road accidents used for reporting and claims.

12. What is no-fault liability compensation?

Interim compensation of ₹50,000 for death or ₹25,000 for permanent disability, payable under Section 140 without first proving who was at fault.

13. What compensation is available in a hit-and-run case?

₹2 lakh for death and ₹50,000 for grievous injury, from the government's Solatium Fund under Section 161, without needing to identify the vehicle.

14. Who processes a Solatium Fund claim?

The Claims Inquiry Officer, typically the officer in charge of the police station where the FIR was registered.

15. Can I claim both the Solatium Fund and a MACT claim?

Generally no — accepting Solatium Fund compensation typically means you cannot also pursue a separate MACT claim for a higher amount.

16. What is the Motor Accident Claims Tribunal (MACT)?

A specialised tribunal that handles third-party compensation claims arising from motor vehicle accidents.

17. Can a hospital refuse to treat an accident victim without police clearance?

No. Since Parmanand Katara vs. Union of India (1989), hospitals cannot lawfully refuse emergency treatment on such grounds.

18. What should I include in a roadside emergency kit?

A first-aid kit, torch, warning triangle, fire extinguisher, basic tools, drinking water, and a list of emergency numbers.

19. What is India's highway-specific emergency helpline?

1033, the NHAI Highway Helpline, for breakdowns, accidents, and hazards on national highways.

20. How long does a hospital have to be paid after a cashless treatment claim is approved?

Within 10 days of approval, under the Cashless Treatment Scheme, 2025.

21. What should I do if I suspect a spinal injury in a victim?

Avoid moving them, use a jaw thrust rather than a head tilt if the airway needs opening, and wait for trained help unless there is immediate danger.

22. Where can I officially verify current accident compensation and treatment scheme details?

On the Ministry of Road Transport and Highways website (morth.nic.in) and the National Health Authority's official portals.

🏁 Conclusion

Nobody plans to be at the scene of an accident, yet almost anyone can end up there — as the person involved, a witness, or simply the first to arrive. In that moment, knowledge matters more than qualification: knowing to call 112, knowing not to move an injured person carelessly, knowing that the law protects you for helping, and knowing that compensation exists even when the odds seem stacked against a victim.

This is only the beginning of your journey with JanGyan toward being someone who knows what to do, not someone who freezes. Stay prepared, stay calm, and remember: **in the golden hour, the person who acts is often more valuable than the person who waits for someone more qualified.**
